

CLEAR VIEW

WINDSCREEN WASH

CLEAR VIEW is a superior blend of alcohol and wetting agents that has been specially developed for the rapid removal of grime and traffic film from windscreens.

During the winter months it will also help clear frost and ice from the windscreens.

CLEAR VIEW is mainly used as a washer bottle additive for screen wash reservoirs, but it may also be used direct from a bucket or poly-spray if washing the windscreen whilst the vehicle is stationary.

CLEAR VIEW is totally soluble in water, and, for use in the washer bottle, bucket or poly-spray, should be diluted with between 5 and 10 parts of water to 1 part of CLEAR VIEW

CLEAR VIEW can be used in neat form as a de-icer, but must be wiped off thoroughly as the visibility through the windscreen can be affected if it is used in excess quantities.
