

MASK

DE-ODOURISING SPRAY FLUID

MASK is a fully biodegradable blend of essential oils and perfumes, emulsified for use at high dilution rates where unpleasant odours present a problem.

Typical areas for application include the following:-

- Sewage Treatment Works
- Animal By-Product Establishments
- Foul Drainage Systems
- External Industrial Waste Sites
- Refuse Carts and Wagons
- Drains, Sewers and Manholes
- Open Ditches and Canals
- Rubbish and Refuse Tips
- Septic Tanks
- Activated Sludge Disposal and Filtering Points
-

MASK will present no problems when discharged around sewage treatment works, including the activated sludge systems.

MASK is non-toxic and non-flammable.

METHOD OF USE:

Manual Systems: Spray, using manual sprayers, diluted with up to 50 parts of water. Aerial

Fogging: Dilute 1 part of MASK with 100 parts of water and disperse via conventional fogging equipment.
