

TRUE GRIP

ICE MELTING GRANULES OR LIQUID

TRUE GRIP has a rapid exothermic action which melts ice and snow quickly.

TRUE GRIP is the safe way to clear snow and ice from roads and pathways.

TRUE GRIP is much more efficient than salt and will work a lot faster.

TRUE GRIP generates its own heat to penetrate and free hard packed snow and ice.

TRUE GRIP is effective at even the lowest temperatures.

TRUE GRIP is supplied in 12kg & 25kg buckets and also as a liquid form in 25 litre containers.

TRUE GRIP is recommended for:- Footpaths, bridges, platforms, parking areas, driveways, loading bays, steps, garages, catwalks and drive in freezers.

DIRECTIONS:

Apply product sparingly, 50g/sq. metre then remove melted slush. Where snow is deeper than 2cm, plough or shovel first, then spread product as above.

N.B. if the snow depth is more than 5cm all de-icers are impracticable.
