

ALL LUBE

SPECIALISED LUBRICATING COATING SYSTEM

ALL LUBE is a special blend of high grade lubricants, penetrants and PTFE resulting in an excellent lubricating coating system.

ALL LUBE prevents sticking, penetrates, de-waters and frees nuts, bolts, mechanisms and switches all in one simple application.

Special additives in ALL LUBE inhibit corrosion leaving areas treated with a removable film coating which is wet to the touch.

A special feature of ALL LUBE is the omission of silicones, so the product is safe to use on surfaces to be painted and in paint areas.

ALL LUBE is safe to use on most metals, plastics, glass, wood, painted surfaces, in fact anywhere where silicone free lubrication is required.

ALL LUBE offers the user a non conductive, water resistant lubricant coating with low friction properties.

RECOMMENDED AREAS OF USE ARE:-

Sliding mechanisms, electrical equipment, car assembly plants, wheels, nuts and bolts, castors, hinges etc., gun mechanisms, sliding doors, conveyors, H.G.V. curtain sliders, bicycles and motor bikes, cars, escalators, lifts
