

PRO SHINE

STAINLESS STEEL CLEANER

PRO SHINE is an up-to-date formulation, producing a very efficient cleaner and polisher for stainless steel surfaces. It also cleans and polishes other bright metal surfaces such as chrome, anodised aluminium and lacquered metal surfaces etc.

PRO SHINE is easy to apply, removing the most stubborn stains and finger marks, including nicotine and other atmospheric deposits.

PRO SHINE does not contain acids or abrasives. Will not scratch, corrode or mar stainless steel surfaces.

PRO SHINE restores the original shine to surfaces.

PRO SHINE is non-flammable and is safe to use on food machinery and surfaces (avoiding direct contact with food).

PRO SHINE is easy to apply. Hold the aerosol upright approximately 6 from the cool and dry surface. Spray lightly, leave a few minutes, and then wipe off with a clean, dry cloth. Buff up with a soft cloth.

When cleaning small areas, PRO SHINE can be sprayed directly on to a cloth and the surface wiped over.
