

PRO TACT

FOR PRECISION AND PROTECTION

PRO TACT is a fast acting, extremely penetrating, highly efficient, degreasing and cleansing agent, formulated to clean most materials and specially recommended for use on electrical and electronic equipment.

PRO TACT is safe to use, giving a consistently high standard of cleaning and leaving no deposit. It is stainless and can be used with complete safety on most metal surfaces, painted surfaces and components containing plastics, resins or elastomers.

Recommended areas for use include:-

PROCESS INDUSTRIES Control systems, instruments, relays, recorders, etc., in the chemical, food and drink, and engineering industries, etc.

CONSUMER INDUSTRIES Television sets, drink and vending machines, gaming machines, car parking devices, tape recorders, magnetic tapes, electricity meters, etc.

TRANSPORT INDUSTRY Automatic signalling equipment, navigational and communication equipment for ships, controls and instruments, fuel filters and meters, hydraulic systems, motors, servos and relays, etc.

TELECOMMUNICATIONS INDUSTRY Broadcasting equipment, transmitters and receivers, telephone switches and relays, small mobile intercoms and paging systems, etc.

Computers, tele-printers, data readers and other office equipment.

The active ingredient remaining after evaporation of the propellant and carrier, is a food grade material and meets FDA 1 standards and is safe for incidental food contact.
