

PRO SIL

CONCENTRATED SILICONE SPRAY

PROSIL is a concentrated silicone spray which is colourless, stainless and odourless, incorporating the following benefits:

Prevents sticking - puts slip where you want it

Has a wide temperature range - from below freezing to 250C

Superb lubricating properties

Good de-electric properties - ideal for electrical & electronic equipment

Water repellence - retarding corrosion

PRO SIL is ideal for lubrication and protection of machinery in the packaging and labelling, printing, plastic moulding, vending, textile and footwear industries, navigation, radio and radar apparatus, office machinery, instrumentation and telemetry systems, etc.

PRO SIL is used to prevent adhesion of various contaminants as a mould release agent.

PRO SIL restores vinyl gloss finish following normal cleaning and has no adverse effect on rubber or urethane-foam backed materials.

In electrical maintenance PROSIL lubricates and protects electronic contact points and other electrical equipment.

The active ingredient remaining after evaporation of the propellant and carrier, is a food grade material and meets FDA 1 standards and is safe for incidental food contact.
