

SWIFT

ORGANIC ACID DESCALER & CLEANER

SWIFT is an extremely effective, fast acting, concentrated acid descaler. SWIFT's special blend of organic acids is safe to use on stainless steel, paints, metals, rubber and lacquered alloys and will bring the shine back to yellow metals. SWIFT quickly and easily removes scale and water marks.

Features & Benefits

- **Rapid action**
- **Contains powerful organic acid blend (pH adjusted)**
- **Safe to use on stainless steel, paints, metals, rubber and lacquered alloys.**
- **Restores shine to yellow metals**
- **Biodegradable at low dilutions**
- **Effective in hard and soft waters**
- **Contains surfactants to aid removal of greasy deposits**
- **Low foaming formula**

Applications:

Highly recommended for cleaning bathrooms, changing rooms, washrooms, wet rooms, shower cubicles, saunas and swimming pools. The low foaming formula allows Bright to be used in washers, boilers and water heaters.

Directions for Use:

For general descaling, dilute from 1 part to 10 parts water up to 1 to 20 parts water and apply via trigger sprayer to surfaces. Allow up to 10 minutes of contact time before rinsing with clean water. Repeat as necessary. Descale weekly for best results. May be used neat to remove heavier scale.

For soaking (eg. shower heads, etc) pre-dilute 1 part to 10 parts water and soak part to be treated. Acts faster in warm water. Allow up to 1 hour contact time. Repeat if necessary.

For heating systems, dilute 1 part to 50 parts water depending on amount of scale, circulate or fill and leave for up to 3 hours. Rinse and flush with clean water.

For machine descaling, dilute from 1 part to 10 parts water to 1 to 20 parts water. Either run a cold wash or rinse cycle.
