

VIRUCIDE

LABORATORY GRADE DISINFECTANT

VIRUCIDE is a proven multi surface all-round disinfectant with a broad spectrum anti-bacterial and anti viral spray designed to eliminate and reduce the spread of harmful germs, viruses, bacteria, fungi & spores with a proven efficiency of up 99.999% against germs and infections. Meets with EN14476 & EN1276.

Ideal for businesses that are looking to stay open and compliant for customer and staff safety during the Covid 19 pandemic.

VIRUCIDE is ideal for sanitising and disinfecting face masks and visors and any other fabric as well as hard surfaces. Simply spray a light mist over the front and back of the mask and leave to dry. For hard surfaces, spray on the whole surface and leave to dry naturally, or wipe with dry cloth.

VIRUCIDE can be diluted with up to 10 parts water, when sprayed on and left to dry. In this current climate it may be prudent to use neat when spraying and then wiping hard surfaces.

VIRUCIDE may be used through a fogging machine. For use in fogging machine dilute with 25 parts water.

Highly recommended in schools, healthcare, leisure centres, buses, taxi's, car/van rentals, hairdressers and in the general workplace.

VIRUCIDE is fragrance free and also alcohol & chlorine free, making it safe to use where vulnerable people are present and safe to store.
