

PRO PINE

HIGHLY CONCENTRATED DISINFECTANT FOR INDUSTRIAL AND INSTITUTIONAL USE ONLY

PRO PINE is an extremely effective, powerful, non-caustic disinfectant, highly concentrated to give maximum protection with economy.

PRO PINE has a Rideal-Walker co-efficient of 10, making it much more powerful than most other disinfectants and, as a result of its high killing power, it can be diluted with up to 500 parts of water and still retain its effectiveness.

PRO PINE kills germs quickly and efficiently, leaving a long lasting, refreshing, pine fragrance. After spraying or mopping with PRO PINE, it will go on working for many hours, killing germs and de-odourising.

PRO PINE will remove smells that cling to surfaces, as it kills the bacteria which cause these smells, and it is also a very effective algacide. PRO PINE is effective on gram-positive and gram-negative bacteria, e.g. *Pseudomonas aeruginosa*, *Salmonella typhi*, *Escherichia coli*, *Staphylococcus aureus*, *Saccharomyces cerevisiae*, *Aspergillus Niger* and *Chlorella pyrenoidosa*. It will also inhibit the growth of fungi which causes the infection known as Athlete's Foot.

PRO PINE is non-corrosive, non-flammable and can be used with the same effect in hard or soft waters.

PRO PINE is highly recommended for use in:-

Food industries, dairy industries, creameries, abattoirs, hotels, hospitals, swimming pools, restaurants, recreational centres, schools, offices, commercial and industrial buildings, toilet areas and seats, washrooms, changing rooms and for controlling biological growth on masonry, etc.

Include PRO PINE in your programme for Health & Safety at Work.
