

BARBERCIDE

SANITISER FOR HAIRDRESSING SALONS & BARBER SHOPS

Barbercide is a broad spectrum disinfectant solution used by barbers and hairdressers for disinfecting non electrical grooming tools such as combs and hair-cutting shears.

Barbercide meets with EN1276.

BS EN 1276 is the European standard for the bactericidal activity of chemical disinfectants as proof of effective infection control against harmful micro-organisms such as MRSA, Salmonella, E.Coli, Flu Virus (H1N1) and Pseudomonas Aeruginosa. To meet with this standard, products must prove a bacteria kill rate of 99.999% within 5 minutes.

Barbercide will not stain skin or surfaces

Barbercide contains a rust inhibitor making it safe to soak non electrical equipment overnight. For electrical equipment specify TERMINATOR

Use neat for a quick reaction or dilute with 10 parts water for overnight soak

Areas of use include :- acrylic tanning beds, stainless steel implements, plastics, shears, combs brushes counter tops, shampoo bowls and just about any salon tool or surface.

DIRECTIONS FOR USE:- Spray onto surface and allow contact time sufficient to penetrate bacteria, or simply immerse equipment in Barbercide overnight after dilution.

Rinse off with water before use
