

# Attack

## MOSS, ALGAE, MOULD AND BACTERIA REMOVER

Attack is a highly concentrated remover of moss, mould, algae and bacteria. The long lasting, chlorine free formula is safe to use on paintwork, metal surfaces, glass and rubber. Following treatment, algae formation is hampered for a long period of time.

### Features & Benefits

- Kills most bacteria, mould, moss and algae
- Long lasting, chlorine free treatment
- Effective at very high dilution rates (economical to use)
- Can be used in pressure wash machines
- Effective in hard and soft waters
- Safe on paintwork, metal surfaces, glass and rubber

### Applications:

Attack is ideal for treating paths, garden furniture, car parks, walkways, steps and fountains. The long lasting, chlorine free formula is safe to use on paintwork, metal surfaces, glass and rubber.

### Directions for Use:

For surface cleaning, dilute up to 1 to 600 parts water depending upon level of growth. Spray directly on affected area. Lower dilution may be required for heavy growth. Glass and furniture should be rinsed with clean water after allowing suitable contact time (suggested 30 minutes to 2 hours). Re-treat periodically.
